● 7 checklist items · 6 new features shipped today

EXECUTIVE SUMMARY

What's in this build

All earlier checklist items are still here, refreshed against the latest dashboard - plus six new features shipped today.

7

CHECKLIST ITEMS

Earlier client requests - all delivered and re-verified.

6

NEW TODAY

Insights, Signal Stack, Add to Calendar, AI Mode, Instant Charts, Pulse.

100%

SCREENSHOTS REFRESHED

Every image recaptured on build df5ef2c (2026-07-01).

NEW THIS BUILD

- Insights - a daily market-intelligence view
- Signal Stack - events, risks & opportunities
- Add to Calendar - keyless Google Calendar link
- Data Audit AI Mode - ask questions on the data
- Instant Visualisation - selection to chart
- Pulse - a curated view of what matters now

EARLIER CHECKLIST - REFRESHED

- ✓ Life insurance removed from industry data
- ✓ GI segment pie (Health, Motor, ...)
- ✓ FY25 -> FY26 across the dashboard
- ✓ Star Health data visibility
- ✓ IGAAP / IFRS accounting toggle
- ✓ Channel / retail-mix conflict resolved
- ✓ '60% guidance delivered' clarified (3 of 5)

From static cards to daily market intelligence

The Insights tab now opens on today's key readout first - a cleaner daily intelligence view.

TODAY'S READ

CONSTRUCTIVE

Net read is constructive: regulatory pressure is building while demand signals stay positive.

CHANGED

Star Health partners Amplify Health on AI-led claims intelligence (Sector Catalyst, 30 Jun 2026).

MATTERS

Large-scale AI deployment in claims can improve fraud detection and operating efficiency, raising the bar for peers including Niva Bupa on claims management and margins.

WATCH NEXT

Whether premium growth stays profitable after claims and expense pressure as conduct rules tighten.

Life insurance removed from the industry view

The industry snapshot now reads purely on general insurance - no life premium blended into any card.

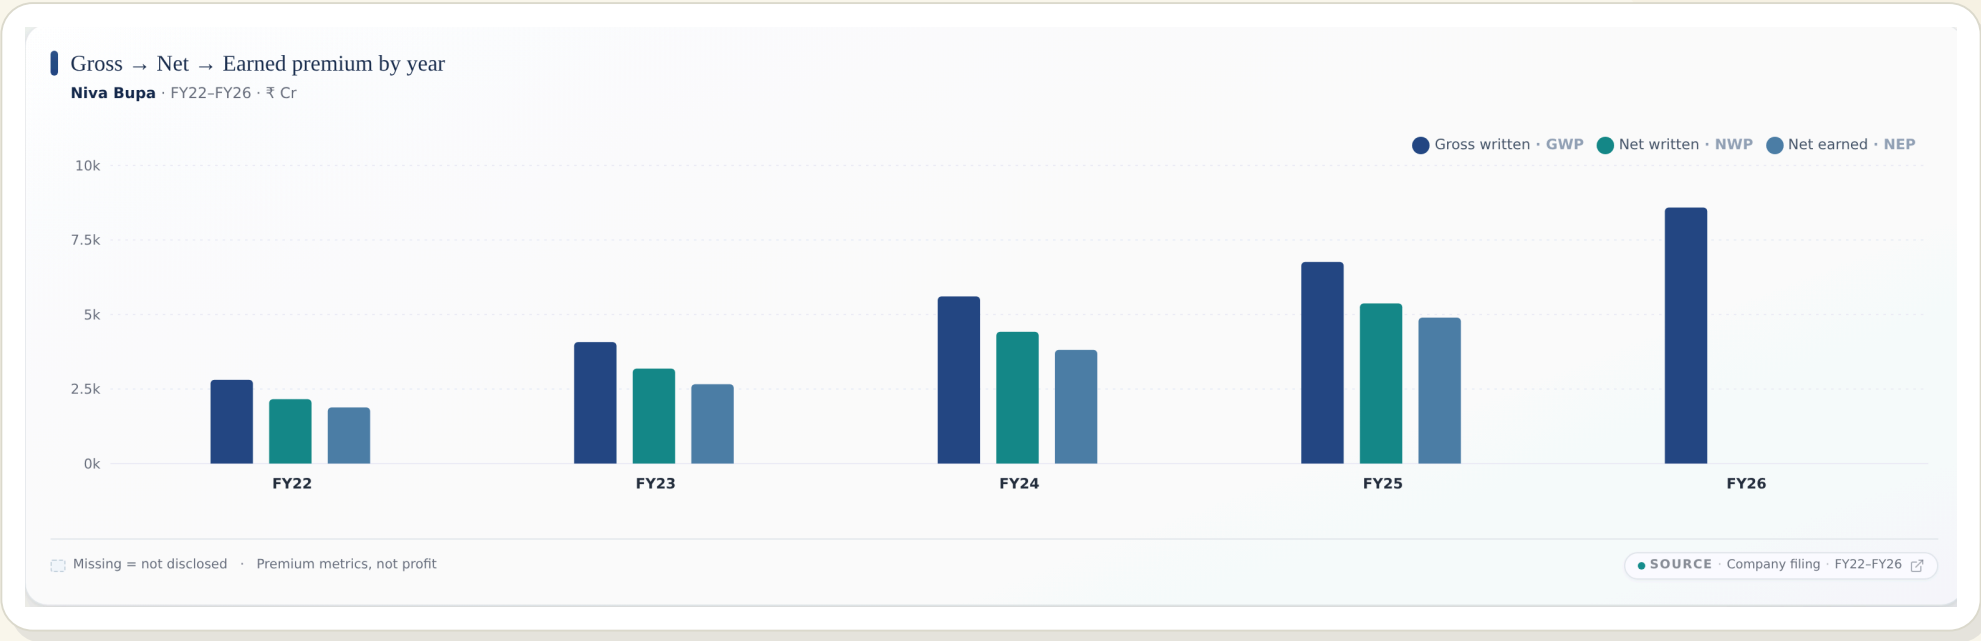

A general-insurance pie, split by segment

Health and Motor lead the GI pool - about 73% together - across seven segments, now with values on the ring.

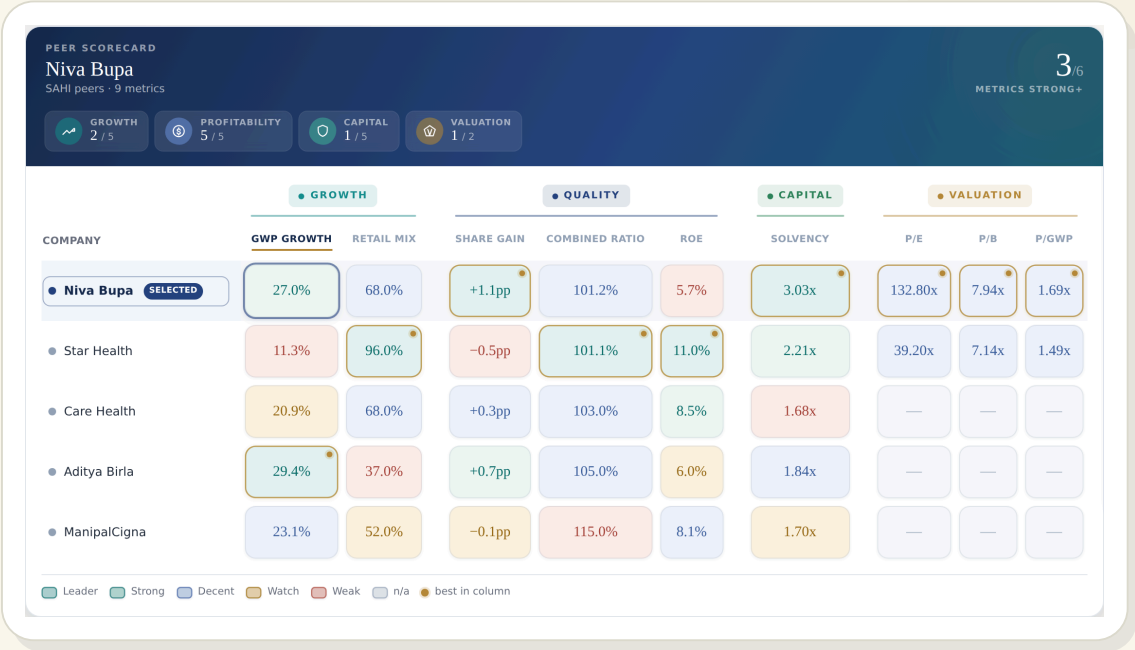

Headline year rolled to FY26

The dashboard reads FY26 wherever the data is published; periods still awaiting FY26 stay honestly labelled.

Star Health, fully visible

Star Health is a complete row in the peer scorecard - every metric populated, no blanks.

One-click IGAAP / IFRS toggle

Switch the lens: the combined ratio restates to IFRS for insurers that publish it (Niva 101.2% -> 103.0%); others stay clearly marked.

The retail-mix conflict, resolved

One derived figure now feeds every surface, so the old 67% vs 88-96% split is gone - the numbers agree by construction.

"60% delivered" - the exact 3 of 5

The Promise Tracker shows which three targets were met and which two are still open, each with its source.

WHAT DID MANAGEMENT PROMISE, AND WHAT ACTUALLY HAPPENED?
