Task Checklist & Build Update

Seven requested changes - what was asked, and the work delivered, with a zoomed-in view of each.

DATE

2026-06-29

PREPARED FOR

Paragon Partners (India)

SCOPE

7 build tasks · 1 dashboard

● 6 delivered · 1 updated as live data lands

What was asked - and where it stands

Six tasks delivered and verified; one rolls forward automatically as fresh FY26 data is published.

- | | | | |
|----|---|--|----------|
| 01 |  | Remove life insurance from the industry data
The industry view now reads purely on general insurance - no life premium blended in. | DONE |
| 02 |  | Pie chart for general insurance, split by segment
A donut of GI premium across Health, Motor, Fire, Crop, PA, Marine & Others. | DONE |
| 03 |  | Move financial-year references from FY25 to FY26
Rolled to FY26 wherever FY26 data is published; remaining periods stay honestly labelled. | UPDATING |
| 04 |  | Star Health data visibility
Star Health is now a fully populated row across every scorecard metric. | DONE |
| 05 |  | Toggle between IGAAP (statutory) and IFRS views
An accounting-basis switch restates the combined ratio onto IFRS, basis-safe. | DONE |
| 06 |  | Fix the channel / retail-mix conflict (67% vs 88-96%)
One derived figure now feeds every surface, so the numbers agree by construction. | DONE |
| 07 |  | Clarify the "60% guidance delivered" metric
The Promise Tracker shows the exact 3 targets met and the 2 not yet met. | DONE |

TASK 01 · INDUSTRY DATA

Life insurance removed from the industry view

THE ASK "Remove life insurance from the industry data."

WORK DONE

- The Industry Snapshot now reads purely on general insurance - the headline is General Insurance Premium Mix, and the health card splits SAHI vs the general insurers' health book.
- No life-insurance premium is blended into any card. PSU-vs-Private is measured on general-insurance premium, and every figure cites the GI Council segment report.

TASK 02 · SEGMENT PIE

A general-insurance pie, split by segment

THE ASK "Create a pie chart focused on general insurance, detailing segments like health and motor."

WORK DONE

- A compact donut shows the Rs 3.36L Cr general-insurance premium split across Health, Motor, Fire, Crop, Personal Accident, Marine and Others.
- Health and Motor - the two segments called out in the ask - together form about 73% of GI premium, stated in plain English beneath the chart.
- Built in the house style: a thin-ring donut with a tinted, tone-coded legend rather than a heavy table.

1. General Insurance Premium Mix (FY26)

Total Premium (₹ Cr) and Market Share (%)

- Health
- Motor
- Fire
- Crop
- Personal Accident
- Marine
- Others

↗ Health and Motor together form about 73% of general insurance premium.

TASK 03 · FINANCIAL YEAR

Headline year rolled from FY25 to FY26

THE ASK "Update all financial-year references from FY25 to the latest FY26 data."

WORK DONE

- Every surface with published FY26 data now reads FY26 - the GI premium mix, SAHI vs Non-SAHI, the premium engine (shown here through the FY26 bar) and peer GWP growth.
- Where FY26 isn't out yet (e.g. full-year profitability), the label honestly stays on its real period rather than mislabelling FY25 as FY26 - so no number ever lies about its year.
- New FY26 columns fill on their own as each disclosure lands, so the view keeps advancing without manual edits.

Gross → Net → Earned premium by year

Niva Bupa · FY22-FY26 · ₹ Cr

Missing = not disclosed · Premium metrics, not profit

SOURCE · Company filing · FY22-FY26

TASK 04 · STAR HEALTH

Star Health is now fully visible

THE ASK "Star Health data visibility."

WORK DONE

- Star Health appears as a complete row in the peer scorecard - every metric populated, no blanks.
- GWP growth 11.3%, retail mix 96.0%, combined ratio 101.1%, ROE 11.0%, solvency 2.21x, plus live multiples (P/E 39.6x, P/B 6.17x, P/GWP 1.49x).
- Statutory figures come from Star's FY25 annual report; the multiples read live market data. Each cell is colour-coded against its peers.

TASK 05 · ACCOUNTING BASIS

A one-click IGAAP / IFRS toggle

THE ASK "Add a toggle to allow users to switch between the statutory (IGAAP) and IFRS views."

WORK DONE

- An Accounting Basis switch sits on the peer scorecard - flip between IGAAP / Statutory and IFRS in one click (shown above).
- On IFRS, the Combined Ratio restates for the insurers that publish IFRS accounts (Niva Bupa, Star, Care). See the change here: Niva's combined ratio moves 101.2% -> 103.0%.
- Insurers with no IFRS filing show " - ", never a misleading cross-basis number. Premium, share, solvency and valuation are basis-neutral and stay put.

• **IFRS lens.** Only the **Combined Ratio** moves to IFRS, and only for Niva Bupa, Star Health, Care Health — the SAHIs that publish IFRS accounts; insurers without an IFRS filing show **N/A** rather than a cross-basis number. ROE has no published IFRS equity, so it stays on the statutory basis. Premium, share, solvency and valuation columns are basis-neutral.

TASK 06 · PREMIUM & DISTRIBUTION

The 67% vs 88-96% conflict, resolved

THE ASK "Validate and fix the data inaccuracy in the channel mix within Premium & Distribution - the conflicting 67% vs 88-96% figures."

WORK DONE

- The clash came from two numbers for one thing: a hand-typed retail mix (Star 67%) sitting beside a chart that derived it from the GI Council health table (~96%).
- Now a single formula feeds every surface - Retail Mix = Retail Health ÷ Total Health - so the peer grid and these Premium & Distribution charts agree by construction (Star now reads 96%).
- A standing automated check blocks the two from ever silently diverging again.

TASK 07 · GUIDANCE

"60% delivered" - the exact 3 met and 2 missed

THE ASK "Clarify the '60% guidance delivered' metric - end-to-end visibility on which three targets were met and which two were missed."

GOVERNANCE SIGNAL

Largely on track 3/5 delivered

We hold Niva Bupa to its word — public guidance against the audited FY25 outcome — alongside the board, KMP and leadership changes on record. Guidance is audited; governance events are source-linked. Market news, analyst actions and catalysts now live in Insights → Curated Market Intelligence.

3/5 PROMISES DELIVERED

2 BOARD / KMP EVENTS

[SOURCE](#) [Company filing](#) [Event-based](#)

WORK DONE

- The Promise Tracker lays out all five public commitments with target, current value, status and a clickable source - 3 of 5 = the 60%.
- Met (3): GWP growth $\geq 20\%$ (27.0%), retail-led book $>50\%$ (68.0%), solvency $>1.5x$ (3.03x).
- Not yet met (2): combined ratio toward $\sim 96\%$ (now 101.2%, Delayed) and ROE to mid-high teens by FY29 (5.7%, On Track - a multi-year target).

WHAT DID MANAGEMENT PROMISE, AND WHAT ACTUALLY HAPPENED?

Promise Tracker

3 **Delivered** 1 **On track** 1 **Delayed / missed** **MOST IMPORTANT PENDING** Bring the combined ratio back down after the 1/N transition Delayed

FILTER All Growth Profitability Distribution Capital Valuation Regulation
